

Computer Simulation of Liquids

Michael P. Allen and Dominic J. Tildesley

Second edition, Oxford University Press, 2017

List of errata up to August 3, 2018

Line numbers below do not include section headings, equations, figures etc.
Negative line numbers are counted up from the bottom of the page.

Chapter 1

p11 $\ell - 16$ ‘It quite possible’ \rightarrow ‘It is quite possible’.

F Perez
2017-10-07
MPA
2017-04-04

p14 In eqn (1.15) the signs of the odd-order terms are wrong:

$$+T_\alpha \rightarrow -T_\alpha \quad \text{and} \quad +\frac{1}{3}T_{\alpha\beta\gamma} \rightarrow -\frac{1}{3}T_{\alpha\beta\gamma}.$$

Chapter 3

p116 All the masses in eqns (3.49ab) should be raised to the power -1 :

A Fleury
2018-08-02

$$\begin{aligned} \mathbf{r}_{12}(t + \delta t) &= \mathbf{r}'_{12}(t + \delta t) + (m_1^{-1} + m_2^{-1})\lambda_{12}^{(r)}\mathbf{r}_{12}(t) - m_2^{-1}\lambda_{23}^{(r)}\mathbf{r}_{23}(t) \\ \mathbf{r}_{23}(t + \delta t) &= \mathbf{r}'_{23}(t + \delta t) - m_2^{-1}\lambda_{12}^{(r)}\mathbf{r}_{12}(t) + (m_2^{-1} + m_3^{-1})\lambda_{23}^{(r)}\mathbf{r}_{23}(t). \end{aligned}$$

The same correction should be applied to eqns (3.53ab); in addition, all the bond vectors in eqns (3.53ab) should be evaluated at $t + \delta t$:

$$\begin{aligned} \mathbf{v}_{12}(t + \delta t) &= \mathbf{v}'_{12}(t + \delta t) + (m_1^{-1} + m_2^{-1})\lambda_{12}^{(v)}\mathbf{r}_{12}(t + \delta t) - m_2^{-1}\lambda_{23}^{(v)}\mathbf{r}_{23}(t + \delta t) \\ \mathbf{v}_{23}(t + \delta t) &= \mathbf{v}'_{23}(t + \delta t) - m_2^{-1}\lambda_{12}^{(v)}\mathbf{r}_{12}(t + \delta t) + (m_2^{-1} + m_3^{-1})\lambda_{23}^{(v)}\mathbf{r}_{23}(t + \delta t) \end{aligned}$$

p141 In the equation at the top of the page the sign of $\mathbf{r} \cdot \mathbf{f}$ is wrong:

MPA
2017-04-30

$$\mathcal{P}' = \mathcal{P} + (d/g)\mathbf{p} \cdot \mathbf{p}/m = \frac{1}{dV}(\alpha\mathbf{p} \cdot \mathbf{p}/m + \mathbf{r} \cdot \mathbf{f}) - \frac{\partial\mathcal{V}}{\partial V}.$$

p142 The expression for iL'_2 should have a factor of d :

MPA
2017-04-30

$$iL'_2 = d(\mathcal{P}' - P)V \frac{\partial}{\partial p_\epsilon}.$$

Chapter 4

p162 In the second part of eqn (4.34), defining the terms $\mathcal{V}_m^{(12)}$ and $\mathcal{V}_m^{(6)}$, the negative sign is wrong: $-\mathcal{V}_m^{(6)} \rightarrow +\mathcal{V}_m^{(6)}$, giving

J Mikhail
2018-05-30

$$\begin{aligned}\mathcal{V}_m &= 4\epsilon \sum_i \sum_{j>i} \left(\frac{\sigma}{L_m s_{ij}^m} \right)^{12} - 4\epsilon \sum_i \sum_{j>i} \left(\frac{\sigma}{L_m s_{ij}^m} \right)^6 \\ &= \mathcal{V}_m^{(12)} + \mathcal{V}_m^{(6)}.\end{aligned}$$

Chapter 6

p229 $\ell 8$ ‘charges densities’ \rightarrow ‘charge densities’.

p251 In eqn (6.106) the factor V should be $1/V$:

MPA
2017-04-19
J Dürholt
2018-04-13

$$\mathcal{V}_{\text{correction}}^{qq} = \frac{2\pi}{V} \left(\sum_i q_i z_i \right)^2$$

Chapter 10

p344 In eqn (10.2b) $\int_{\mathbf{r} \in \mathbf{A}} \rightarrow \int_{\mathbf{r} \in \mathbf{B}}$.

MPA
2017-03-07
